Diesel Heater  
Includes  
5 gal. Diesel Tank

has been building boats since 1990 with quality and performance of all models always being at the forefront on each design.

Raider Pro-Sport is a very easy planing boat; four lifting strakes helps to lift the hull faster than most boats of the same size for a given horsepower. The lifting strakes not only add speed but they help in directional control. The structure in the hull is the same as the 28' boats.

The Sea-Raider line of boats are built to withstand commercial use; they have 5 or 7 longitudinal stringers welded to the bottom then the floor support structure is welded in; the floor support and stringers are then connected by gussets that are welded to the bottom and the floor support. There are Sea-Raiders in Alaska that have been in use for ten years and made over 1000 fishing trips with no trouble (personal use as well as guide boats).
